The solution for growth and bloom

# ONE LESS THING TO WORRY ABOUT

Professional growing solutions

# ABOUT CANNA

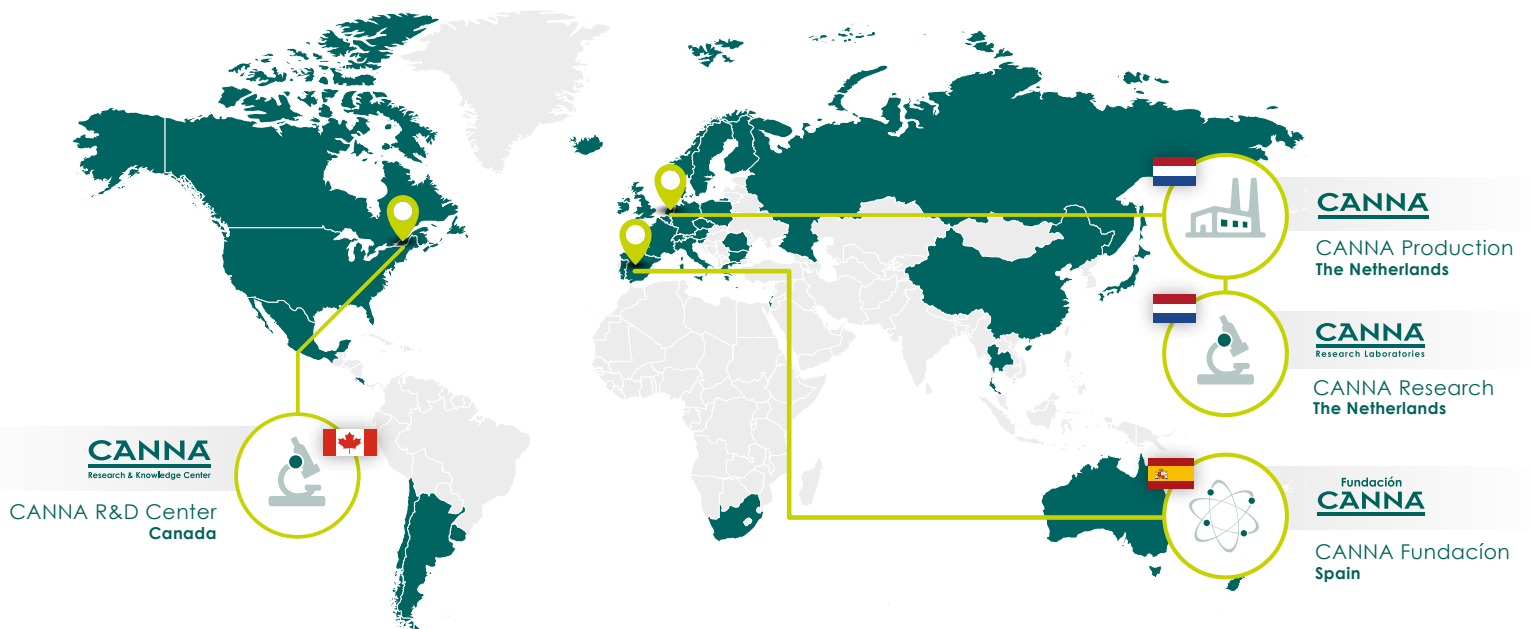

Quality through research, knowledge and experience.

CANNA originated in the Netherlands over 30 years ago where the demands of high efficiency plant production and environmental protection steered the company's product development. As a result, CANNA has perfected its products to provide the precise quantity of nutritive elements in ideal ratios which contributes to superior performance and more healthful plants. CANNA offers market competitive costs for a premium product.

CANNA supplies growers from all over the world with products that suit their growing systems. By continuously

looking into plants, growing conditions and crop specific needs we are able to offer not only the right products, CANNA prides itself to be able to assist every kind of grower to optimize their growth. We like sharing our growhow with you.

With 3 unique R&D facilities globally we are able to keep track of market developments and test all products and techniques ourselves first. Our growers understand your needs from their own experience.

“

*CANNA nutrients gives us that total peace of mind. We have always used CANNA, and our consumers enjoy the taste we consistently give out. There is definitely a correlation between the taste of the end product and nutrients that are used.*

”

COO of Lot420, Canada

## CANNA PRODUCTION AND QUALITY CONTROL

CANNA manufacturers all its products according to strict quality standards:

- ISO:9001 certified production processes
- Strict quality control and batch sampling
- Traceability to the source, kept on hand for 3 years
- Quality Control and heavy metal analysis available per batch
- RHP standards for substrates

CANNA products are compliant with local regulations and therefore compliant with your needs. We understand the importance of the papertrail.

# EASY AS 1 - 2 - 3

- 1** YOU CHOOSE THE **SUBSTRATE** FOR THE GROW  
CANNA substrates are manufactured to meet rigorous international RHP certification standards. Sourced from superior quality ingredients, our substrates deliver exceptional results.
- 2** OUR **CANNA BASE FERTILIZER** PROVIDES ALL CORRESPONDING NUTRIENTS  
Complete base nutrient lines specifically crafted to integrate with your growing system. Our proven formulas result in consistent and quality crops for large scale cultivation.
- 3** **CANNA ADDITIVES** SERVE AS AN ADDITIONAL TOOL FOR ROOT OR BLOOM STIMULATION  
Improve the overall health of your plants, producing a more optimal end result. Compatible with all fertilizer lines, our additives offer specific enhancement throughout the grow cycle.

## CANNA COCO

CANNA COCO is a line of nutrients and substrates which are specially developed for growing plants in coco.

### CANNA COCO SUBSTRATE

Carefully washed and buffered coco growing medium and ready to use coco growbags.

### CANNA COCO A & B

2-part fertilizer for the entire growth cycle, specifically designed for the unique characteristics of coco substrate

NPK Fertilizer solution / NPK 5-2-2 with Ca, Mg  
Reg No. B 5972 Act. No. 36 of 1947 / Reg No. B 5978 Act. No. 36 of 1947  
Group 2 fertilizer

## CANNA SUBSTRA

Base fertilizers designed for usage on inert growing medium like rockwool, perlite and peat in run-to-waste systems.

### CANNA SUBSTRA VEGA A & B

2-part fertilizer for the vegetative phase

NK Fertilizer solution / NK 5-6 with Ca, Mg and micro-elements  
Reg No. B 5973 Act. No. 36 of 1947 / Reg No. B 5975 Act. No. 36 of 1947  
Group 2 fertilizer

### CANNA SUBSTRA FLORES A & B

Substra Flores is rich in phosphorous and potassium and the special chelated trace elements allow direct absorption resulting in a perfect bloom.

NPK Fertilizer solution / NPK 5-1-7 with Ca, Mg, S  
Reg No. B 5977 Act. No. 36 of 1947 / Reg No. B 5980 Act. No. 36 of 1947  
Group 2 fertilizer

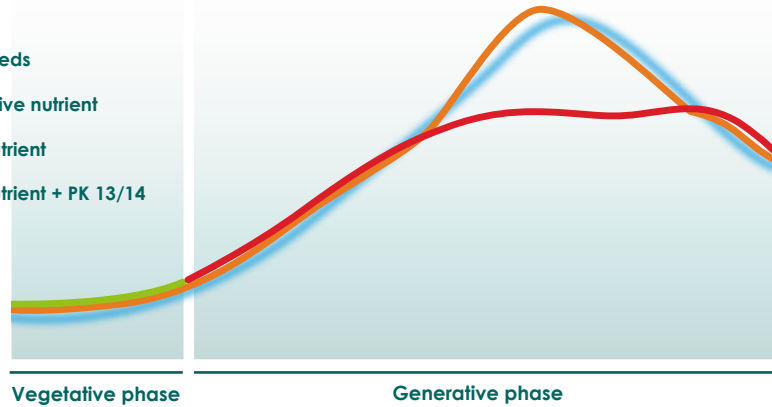

# CANNA PK 13/14

CANNA PK 13/14 is a mixture of top quality nutritional minerals that stimulate flowering. It's easy- to-use and makes high yields. PK 13/14 is suitable for any growing medium.

## PK 13/14 VS PLANT NEEDS

- Plant needs
- Vegetative nutrient
- Floral nutrient
- Floral nutrient + PK 13/14

PK Fertilizer solution  
PK 5-10  
Reg No. B 5971 Act. No. 36  
of 1947 / Fertilizer group 1

# CANNA ROOTPLUGS

A perfect solution for the rooting of cuttings and sprouting seedlings. The perfect air-moisture retention ratio of the CANNA Rootplug ensures fast and vigorous rooting. Pre-dried for a longer shelf life.

## CANNA Distribution

CANNA products are distributed in Southern Africa by:
